

CHIUNG-WEN CHANG

Frontend Engineer | Bank-Grade Web3 & Fintech Systems | React, Next.js, TypeScript

0910-938-630 | joankaminari@gmail.com | linkedin.com/in/joanvisual | Taipei

SUMMARY

- Frontend engineer focused on bank-grade fintech systems
- Currently building the M-Key crypto custody platform at BlockChain Security Corp, serving banks and law-enforcement agencies
- Brings 11 years of design experience, with a track record of turning ambiguous requirements into shippable solutions

EXPERIENCE

BlockChain Security Corp.

Frontend Engineer | Nov 2024 – Present

M-Key Crypto Vault Custody System

- Core frontend engineer on M-Key, building key modules including vault management and 30+ approval event workflows, on a cross-functional team of 10+ serving banks, enterprises, and law enforcement agencies
- Built M-Key's design system on shadcn/ui, cutting feature delivery time from 10 days to 3 days. The team later extended it into a shared UI component library
- Identified that the FIDO2 authentication frontend had drifted from the main system's architecture, then led the consolidation: redesigned the proxy routing between services and brought this sensitive verification flow into the main frontend for unified maintenance
- Redesigned the HSM initialization flow, requiring FIDO verification for any privileged access to HSM to strengthen security, and added i18n support to align with the company's push into overseas markets

Snowbridge

Frontend Engineer | Oct 2023 – Oct 2024

1510.ai PropTech Productivity Tool

- Independently handled the desktop frontend for the property disclosure system, using the company's required Next.js stack to build the entire product from scratch
- Chose the supporting stack (Tailwind CSS, Paged.js) and built 1510.ai from an empty repo to MVP, cutting document preparation time from 4 hours to 30 minutes, a 700% improvement validated by partner real estate agents
- Delivered a circular economy platform prototype in 3 weeks integrating Ethereum smart contracts, including batch NFT transfers and multi-role inventory management

Self-employed

Product Designer / Project Manager | Mar 2018 – Oct 2023

- Independent design consultant for 5+ years, managing quoting, scheduling, and vendor coordination on my own; some client relationships lasted 7+ years
- Took over the delayed Gold Alles crypto wallet app as a 4-month rescue project, redesigning the app, website, and exhibition booth, and delivered it on time for the Financial Expo launch
- Led the Ministry of Economic Affairs' Bureau of Energy net-zero transition website, Source Universe, as PM for nearly 2 years, coordinating decisions across the client, technical advisors, and multiple vendors; live since 2021 and still supporting 100+ government events

BVG Corp

Art Director | Aug 2017 – Feb 2018

- Proposed a purchase journey audit framework and gave UX and visual direction recommendations to SME clients

Surasia

Senior Designer | Apr 2016 – Jul 2017

- Led the Paganini Plus rebrand and built a reusable design system with a style guide site

BOYU Design

Brand Designer | Jun 2014 – Nov 2015

Innospread Design

Graphic Designer | Jul 2012 – May 2014

SKILLS

- **Frontend:** React.js, Next.js, TypeScript, HTML5, CSS3, JavaScript, Git, TanStack Query, Zod
- **Design:** UX/UI Design, Design Systems, Figma, Brand Identity
