

JOAN CHANG

Frontend Engineer | UI/UX Designer

joankaminari@gmail.com · www.linkedin.com/in/joanvisual · Taipei, Taiwan

PROFESSIONAL SUMMARY

- **Bank-Grade Web3 Development:** Engineered M-of-N multi-sig custody systems for compliant banks using Next.js/TS, ensuring high-security transaction workflows and real-time asset monitoring.
- **PropTech & Blockchain Specialist:** Delivered 1510.ai, a real estate automation tool that boosted efficiency by 700%, and integrated blockchain anchoring to ensure immutable rental data.
- **Design-to-Code Excellence:** Expert in Design Systems and Lit (Web Components), achieving 100% visual consistency between complex web interfaces and A4 PDF legal documents.

SKILLS

- **Frontend:** React, Next.js, TypeScript, TanStack Query, Redux, Tailwind CSS, Lit (Web Components), Paged.js.
- **Web3:** Multi-sig Workflows, On-chain Data Verification UI, Vault Management Logic
- **Tools & Design:** Zod (Validation), AI-Assisted Development (Claude Code), NextAuth, i18n, Git, Figma (Design Systems)

PROFESSIONAL EXPERIENCE

BlockTech

Frontend Engineer | Nov 2024 – Present

M-Key Crypto Vault Custody System (Bank-Grade Compliance Project)

- Engineered a Multi-Sig (M-of-N) Authorization Interface for institutional banks, implementing complex multi-level approval workflows and managing cross-module states via Redux.
- Optimized Blockchain Transaction UX by leveraging TanStack Query for asynchronous polling, resolving latency issues and ensuring real-time asset status synchronization.
- Implemented Rigorous Financial Data Validation using Zod to intercept invalid addresses and ensure high-precision transaction amounts, achieving zero-error processing.
- Architected Scalable i18n & Modular Components to meet international banking standards, ensuring system stability during high-frequency iterations.

Regulatory Asset Seizure Management System

- Developed Micro-frontend UI Components using Lit (Web Components), establishing a standardized library that resolved cross-platform compatibility issues across various environments.

Snowbridge

Frontend Engineer | Oct 2023 – Oct 2024

1510.ai PropTech Productivity Tool

- Spearheaded MVP Development from 0 to 1, integrating multiple APIs (Land/Building records, Tax, etc.) to provide a comprehensive digital real estate solution.
- Achieved 700% Efficiency Increase by automating property brochure generation, reducing processing time from 4 hours to 0.5 hours.
- Ensured Perfect Visual Consistency by utilizing Paged.js and Tailwind CSS to sync layout logic between web interfaces and A4 PDF legal documents.

Blockchain-Based Rental Platform

- Designed Multi-Role Governance Workflows using NextAuth, managing complex permission logic for banks, arbitrators, and agencies.

Selected Design Experience

Freelance Product Designer / Project Manager | Mar 2018 – Oct 2023

- **DEAC Gold-Backed Token Exchange:** Led the end-to-end UX/UI design for the web and mobile wallet app. Simplified complex gold-to-crypto trading into an intuitive 3-minute process, significantly increasing app downloads and investor conversion rates during financial expos.
- **Energy Administration (Net-Zero Transition):** Managed a cross-functional team to visualize complex energy policies into interactive 3D animations and web content, supporting 100+ events with a scalable site architecture.
- **Brand & Modular Web Design:** Developed high-end brand identities and responsive design systems for luxury clinics, ensuring seamless online-to-offline brand experiences.

BVG Corp

Art Director | Aug 2017 – Feb 2018

- E-commerce Strategy: Served as a design consultant for lifestyle and boutique brands, optimizing UX strategies that boosted user retention and conversion.
- Scalable Systems: Built modular page systems and CMS structures to reduce maintenance costs and enable rapid marketing deployment.

Shuya Integration

Senior Designer | Apr 2016 – Jul 2017

- Ad-Tech UX: Designed automated creative tools for the TMP advertising platform, lowering barriers for SMEs to generate and track marketing performance.
- Enterprise Dashboard: Led the UX overhaul of the "E.SUN Cloud" platform, optimizing information architecture for better operational flow.

Earlier Career Highlights

Brand & Graphic Designer | Various Agencies | 2012 – 2015

- Led brand identity development and visual systems for diverse international FMCG, beauty, and industrial sectors. Focused on building scalable design foundations and intuitive software interfaces for industrial applications.

PROFESSIONAL EXPERIENCE

National Kaohsiung Normal University | Bachelor of Arts in Visual Design | 2008 – 2012
